

LICENSED LAND SURVEYOR

SMH Consultants, P.A.

Posted: October 2023

Open Until Filled

SMH Consultants, P.A. (SMH) is a growing 35-year-old civil engineering and land surveying company with primary areas of expertise in land development and surveying. Company-wide, SMH has 37 full-time employees throughout its headquarters office in Manhattan, KS and additional offices in Dodge City, KS; Mission, KS; and Colorado Springs, CO. SMH is a solid company built on experience and long-lasting relationships with clients. The dedication and commitment to this approach is what sets SMH apart from other competitors. We accomplish this by hiring great employees and providing them a work environment that is professional, relaxed, and fun.

Our company is seeking a permanent **Licensed Land Surveyor** to join our team in the Manhattan, KS office. In this position, you will play a crucial role in managing our survey team that consists of 8 employees, and developing maps and reports for our clients. Qualifications and responsibilities of the position include:

Qualifications:

- Experience with boundary surveys, topographic surveys, utility surveys, construction staking, platting, writing legal descriptions, and familiarity with construction plans and designs related to land development, highways, water, and sanitary sewer infrastructure, and various other utilities.
- Experience developing engineering, boundary, and other surveys for the Kansas Department of Transportation (KDOT)
- Must be a licensed Professional Land Surveyor in Kansas. Licensure in states adjacent to Kansas is desirable, but not required.
- Computer Aided Drafting (CAD) and software experience that is utilized for working with survey data sets. Software experience should be with software that is compatible with Autodesk Civil 3D; however, SMH is flexible in terms of software brands.
- 5-10 years of previous work experience during which time the applicant was licensed

Responsibilities

- Scheduling survey crews
- Preparing survey crews with information needed to complete field work for the day
- Reviewing plats drafted by technicians
- Reviewing topographic surveys based on field data
- Writing legal descriptions
- Preparing scopes of work and costs estimates
- Management of survey equipment
- Survey employee training
- Working with clients

In addition to these responsibilities, the applicant will be required to stay abreast of and potentially implement new technologies being utilized in the survey industry. Compensation will range from \$90,000-\$110,000 annually based on qualifications and experience. Benefits include a 401K retirement plan, paid time off, health care plan, and professional development opportunities. We encourage you to apply if you meet our criteria and possess strong organizational and collaborative skills. Learn more about the company at www.smhconsultants.com.

SMH is an equal opportunity employer. All employees are hired at-will and subject to a 90-day primary evaluation period.
